

**FIRE SALE**  
**\$195,000 O.B.O.**

Our office is under strict orders from the Seller to locate a buyer this month. All offers and terms will be considered. Seller financing available up to 24 months.

### LET'S MAKE A DEAL

Take this rare opportunity to purchase a pre-operational cultivation facility, that has VERTICAL INTEGRATION capabilities. About 75% of the cultivation construction is completed, and license has a grandfathered approval to also build a retail facility at the same premises! A vertically integrated cannabis facility offers significant advantages by streamlining operations and increasing profitability. By controlling the entire supply chain: you can reduce costs, maintain consistent quality, and adapt to market demands more efficiently. Integration also mitigates risks associated with supply shortages or price fluctuations, providing a competitive edge in the marketplace. Maine, one of the East Coast's most established cannabis markets, is a proven hub for cannabis demand and continues to thrive. With \$166 per capita recreational sales in 2023—among the highest in the U.S.—and a 36% increase in recreational sales to \$216.9 million from 2022, Projections for 2024 estimate sales will exceed \$240 million. Don't miss your chance to capitalize on Maine's thriving cannabis industry.
